1. Introduction

- Both divisions delivered excellent results for the first nine months of the year, marking our strongest Q3 performance in the past three years.
- In Spain, the rice harvest has rebounded following three particularly challenging years, with Extremadura reaching 100% and Andalusia 70%. This recovery will allow us to better leverage our local installed capacity in 2025.
- The rice season is progressing well, with strong harvest volumes across all countries. However, in parts of the US and Italy, rainfall during harvest has impacted quality and subsequently industrial yields.
- Prices of Asian rice varieties are falling, but freight costs to Europe and North America remain high due to the ongoing conflict in the Red Sea. The time lag between the production and consumption of aromatic rice is another factor preventing these lower prices from reaching consumers.
- The fresh pasta business continues to show strong growth.
- The Garofalo business has performed extremely well.
- The sale of the dry warehouses in northern France was completed during Q3 for EUR23.5 million.

2.1.1 Rice 9M24

- The rice division experienced robust growth during the first nine months of the year.
- Looking at the raw materials markets, we anticipate an excellent long-grain rice harvest in Spain, though this will reduce the Group's competitive edge due to its strategic global position. The European Union's tariff policy for EBA countries has led farmers to push for safeguarding measures to protect local production. The US harvest arrived slightly ahead of schedule, which is resulting in some price decreases.
- Sales continue to rise across most of our markets. All Herba brands recorded growth, although this was not enough to fully counterbalance the increased costs of short-grain and parboiled rice in the previous campaign. The frozen goods group continues to deliver outstanding results, alongside the United Kingdom, India and Thailand businesses.
- The rice business in France performed particularly well, with an 8% increase in sales.
- Riviana posted healthy sales, particularly for the Mahatma and Carolina brands. Microwave products are also performing well globally, although growth in the US is slowing due to delays in the capacity expansion work in Memphis, which is also experiencing cost overruns from increased imports.
- Tilda sales are rising in all the countries where it operates, including the United Kingdom, Australia and the Middle East, etc. However, rising freight costs from India have prompted a shift towards bulk cargo shipping.

2.1.2 Rice 9M24

- Sales in the rice division increased to EUR1,837.5 million, thanks to higher volumes in most markets. In terms of CAGR 24/22, this figure is up by 3.5%.
- We continue to step up advertising investment to support new launches for all our brands. Advertising was therefore up 11.4% to EUR45.2 million.
- Ebitda-A grew 4% to EUR241.5 million; growing 6.4% in terms of CAGR 24/22. The exchange rate had almost no impact on this figure.
- Operating profit grew 5.3% to EUR185.0 million.

2.2.1 Pasta 9M24

- Our global fresh pasta business continues to perform very well, achieving double-digit growth driven by the strength of our core products and the success of new product launches.
- The business has performed exceptionally well in France, bolstered by the successful launch of products such as Gnocchi Star, as well as weather conditions that encouraged greater pasta consumption, compared to the hotter summer of 2023.
- In Canada, Olivieri continues to outperform the market, supported by the expanded capacity of our gnocchi factory.
- Garofalo posted 16% growth worldwide, with strong performance in Italy, the US and the rest of Europe.
- While the price of durum wheat semolina is expected to fall, a potentially poor harvest in Belgium could lead to rising potato prices.
- Rising sales continue to drive strong results for the division.

6

2.2.2 Pasta 9M24

- Turnover grew 6.2% to EUR512.5 million, thanks to increased volumes.
- Advertising grew 12% to EUR27.6 million, driven by new product launches.
- The Division's Ebitda-A grew 27.2% to EUR79.4 million. The Ebitda-A margin grew by 2.6 p.p. The exchange rate had no impact on these results.
- Operating Profit grew 93.2% to EUR67.4 million.

3.2 Debt Performance

- We ended the first nine months of the year with Net Debt standing at EUR511.3 million, EUR59,0 million less than in December 2023. This figure includes the payment of annual dividends, which amounted to EUR114 million.
- Working capital fell by EUR30 million compared to year-end 2023, due to reduced stocks.
- We should note that the put options that we have with minority shareholders of certain businesses amount to EUR305 million, while debt recognised under IFRS 16 amounted to EUR56 million.
- Corporate income tax in 9M 2024 stood at EUR44.6 million.
- Capex investments during 9M amounted to a total of EUR100.7 million.

4. Conclusion

- The first nine months of 2024 close with Ebitda-A standing at EUR308.0 million, marking a double-digit increase in CAGR over the last three years.
- Both divisions are posting improved returns, with a notable turnaround in the pasta division.
- Rising freight costs from certain regions are likely to result in higher working capital at the end of the year, as we will need to revert to full-ship deliveries for rice supplies.
- We expect Ebitda-a to reach EUR402-407 million by year-end, which would represent an excellent outcome for the Group.

6. Calculation of Alternative Performance Measures

Ebro

- According to the guidelines set by the European Securities and Markets Authority (ESMA), the following is a list of the indicators used in this report. These indicators are currently and consistently used by the Group to describe its business performance and their definitions have not been altered:

- EBITDA-A. Earnings before interest, taxes, depreciation and amortisation, excluding results considered as extraordinary or non-recurring (essentially profit earned from transactions relating to the Group's fixed assets, industrial restructuring costs, results from or provisions for lawsuits, etc.). EBITDA-A is calculated consistently with prior-year EBITDA-A.
- EBIT-A is calculated by subtracting the year's amortisations and depreciations from EBITDA-A. EBIT-A is calculated consistently with prior-year EBIT-A.

	30/09/2022	30/09/2023	30/09/2024	2024 - 2023
EBITDA(A)	244.896	284.366	308.023	23.657
Dotaciones para amortizaciones	(75.668)	(75.531)	(79.471)	(3.940)
EBIT(A)	169.228	208.835	228.552	19.717
Ingresos no recurrentes	917	2.631	17.781	15.150
Gastos no recurrentes	(24.707)	(7.390)	(6.502)	888
RESULTADO OPERATIVO	145.438	204.076	239.831	35.755

- CAPEX. Capita expenditure - payments for investment in production related fixed assets.
- Net Debt:

	30/09/2022	30/09/2023	30/09/2024
(+) Pasivos financieros no corrientes	549.878	539.380	164.257
(+) Otros pasivos financieros corrientes	391.052	405.137	823.855
(-) Préstamos a empresas asociadas	(1.122)	(1.122)	(1.122)
(-) Suma de fianzas a pagar	(676)	(676)	(85)
(-) Tesorería y otros activos líquidos	(229.562)	(354.296)	(474.221)
(-) Derivados – activo	(2.587)	(1.486)	(2.046)
(+) Derivados – pasivo	5.025	1.280	742
TOTAL DEUDA NETA	712.008	588.217	511.380

- (Average) Net Debt: Average net debt refers to the 13-month moving average based on previous net debt.
- (Average) Working Capital: 13-month moving average of the sum of inventories, trade receivables and provision of services, other receivables less trade payables and other current payables.
- Capital Employed (average). 13-month moving average of the sum of intangible assets, property, plant and equipment and working capital.
- ROCE-A: Ratio of the average profit/loss after depreciation/amortisation and before tax for the last 12-month period (excluding extraordinary and non-recurring items) divided by the average capital employed, as previously defined. ROCE-A is calculated consistently with prior-year ROCE.
