## Animal Welfare: Cage-Free Eggs

### 2025 Progress Report

## Animal Welfare: Cage-Free Eggs

---

### Our Commitment

---

As a global leader in the food sector, Ebro Group recognises animal welfare as a key element of its commitment to responsible sourcing and ethical business conduct. This principle is fully embedded in our due diligence processes throughout the supply chain, ensuring strict compliance with the highest animal welfare standards.

---

### Cage-Free Eggs - 2025 Progress

---

As part of our commitment to animal welfare, Ebro Group's Global Sustainability Plan **HEADING TOWARDS 2030** established in 2019 the objective of ensuring that our entire supply chain uses only cage-free eggs.

During 2025, we have continued to make significant progress in this transition. The proportion of cage-free eggs used has continued to increase steadily year after year, and in some cases, we have already achieved the 100% target.

COUNTRY	% CAGE-FREE EGGS	NEAR-TERM OBJECTIVE
Italy	67%	100% for 2030
Spain	100%	✓
France	100%	✓
United Kingdom	100%	✓
Denmark	100%	✓

The Group continues to make steady and sustained progress towards achieving its global objectives, thanks to close collaboration with its suppliers and the shared commitment of its business partners.
